Durable Flexipave Solutions

PMP Surfacing has completely transformed Tynemouth Golf Club with its innovative Flexipave surfacing.

Following a thorough consultation with the golf club, numerous issues were identified, including poor accessibility for golfers and visitors alongside persistent drainage problems that affected the course's usability.

The club also had a long-standing history of accessibility challenges during the winter months, which made sections of the course difficult to navigate. Flexipave was recommended as the ideal solution, providing a durable, all-weather surface that improves both safety and convenience. This ensures the course remains open for play and welcoming throughout the year, regardless of the conditions.

Transforming Tynemouth Golf Club

PMP Surfacing recommended Flexipave as the ideal solution to address the long-standing issues with the golf club's existing pathways.

Flexipave was selected to enhance accessibility and improve the overall experience for golfers navigating the course.

The club has since witnessed a significant increase in member satisfaction with golfers now relishing the improved playing experience and the reliability offered by the new surfaces.

SPECIFICATION:
1300 m² of Flexipave – Signal Red

Key Benefits

Recycled Material Usage - 680 end-of-life vehicle tyres were repurposed, giving the materials a second life instead of sending them to landfill.

Environmental Impact Reduction - this reuse prevented approximately 14,960 kg of CO_2 from being released through incineration.

Sustainable Construction - the project demonstrates eco-friendly building practices and reduces the overall environmental footprint of the site.

Durability and Longevity - recycled rubber provides a robust, long-lasting surface capable of withstanding heavy use.

Enhanced Safety - the surface offers excellent shock absorption and non-slip properties, ensuring safer pathways for all users.

"The excessive costs of maintaining what were very tired paths at Tynemouth Golf Club seemed like a waste of money. Members were complaining that the paths were uneven, muddy when wet, and slippery—especially in the winter.

We initially approached PMP Surfacing about the path on the 18th tee. We agreed a price and the path was installed. I have nothing but praise for PMP Surfacing; even when issues arose, they addressed and sorted them immediately. Following the success of that path, it was a no-brainer, and we decided that all the paths needed doing.

We contracted PMP Surfacing to prepare and install the paths, including the base preparation. Despite choosing the worst autumn and winter weather possible, PMP Surfacing worked brilliantly alongside our Head Greenkeeper. They managed to give us paths that we are really proud of, and both members and visitors praise their quality and appearance. I would have no hesitation in recommending PMP Surfacing to any golf club."

Neale Coleman, General Manager,
