Resin Bound Surfacing For Driveways and Paths

PMP Surfacing uses high-quality natural stone aggregates combined with a commercial-grade polyurethane binder to create durable, permeable and visually appealing surfaces for domestic settings. This ensures long-lasting performance, excellent drainage and a finish that enhances the kerb appeal of any home.

As one of the UK's leading installers of resin-bound systems, PMP Surfacing brings over 10 years of experience to every project, transforming driveways, paths and patios to help bring your dream home vision to life.

Long-Term Solution

PMP Resin Bound Surfacing offers a hard-wearing, UV-stable solution that will not crack or fade, ensuring your driveway remains a stunning, low-maintenance asset for decades.

Built to Last: A Premium Resin Driveway Solution

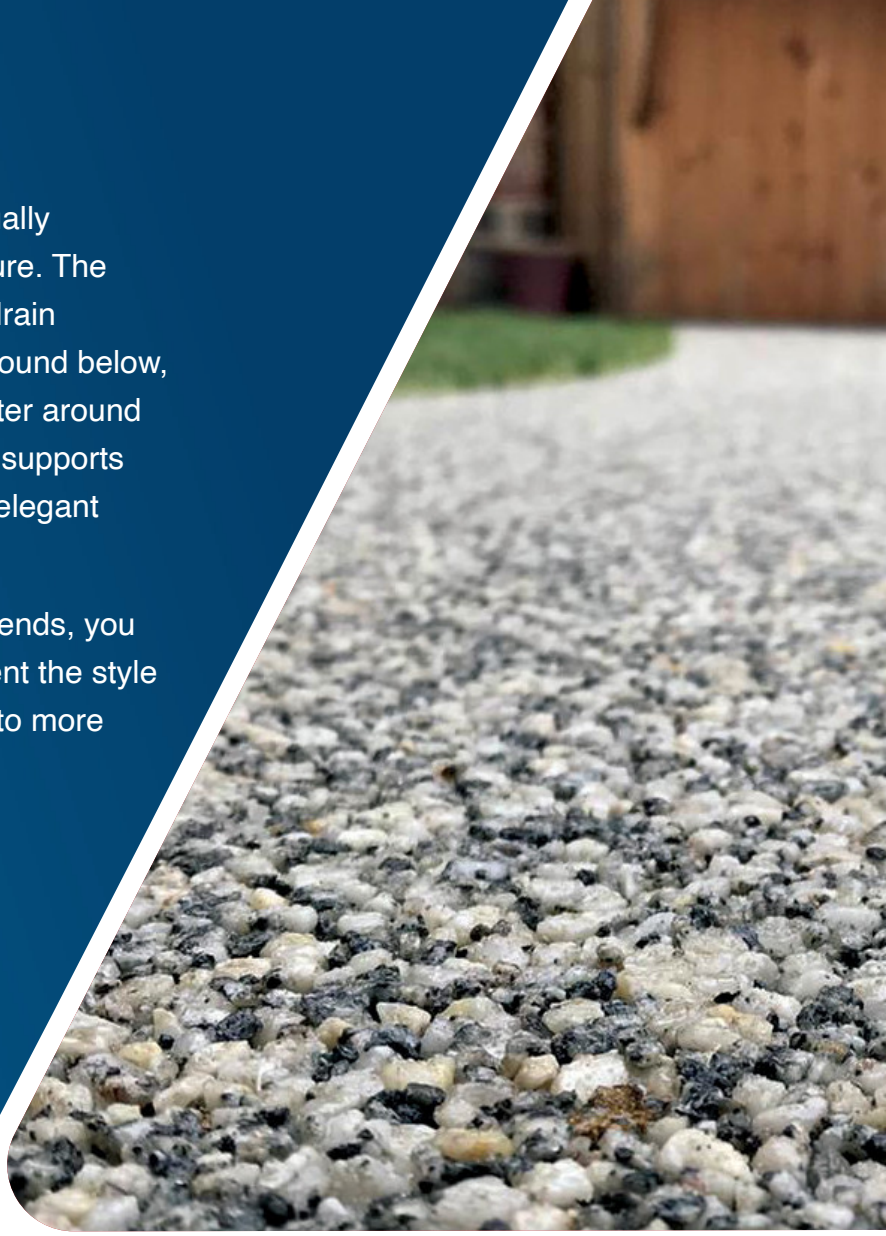

Smart Drainage, Beautiful Finish

PMP Resin Bound Surfacing is not only visually stunning; it also works in harmony with nature. The highly porous structure allows rainwater to drain naturally through the surface and into the ground below, helping to prevent puddles and standing water around your property. This SuDS-compliant system supports natural drainage while maintaining a clean, elegant appearance.

Available in a wide range of natural stone blends, you can choose colours that perfectly complement the style of your home – from contemporary finishes to more traditional looks.

Key Benefits

Decorative Natural Stone Finish - enhances the aesthetic appeal of driveways and garden paths.

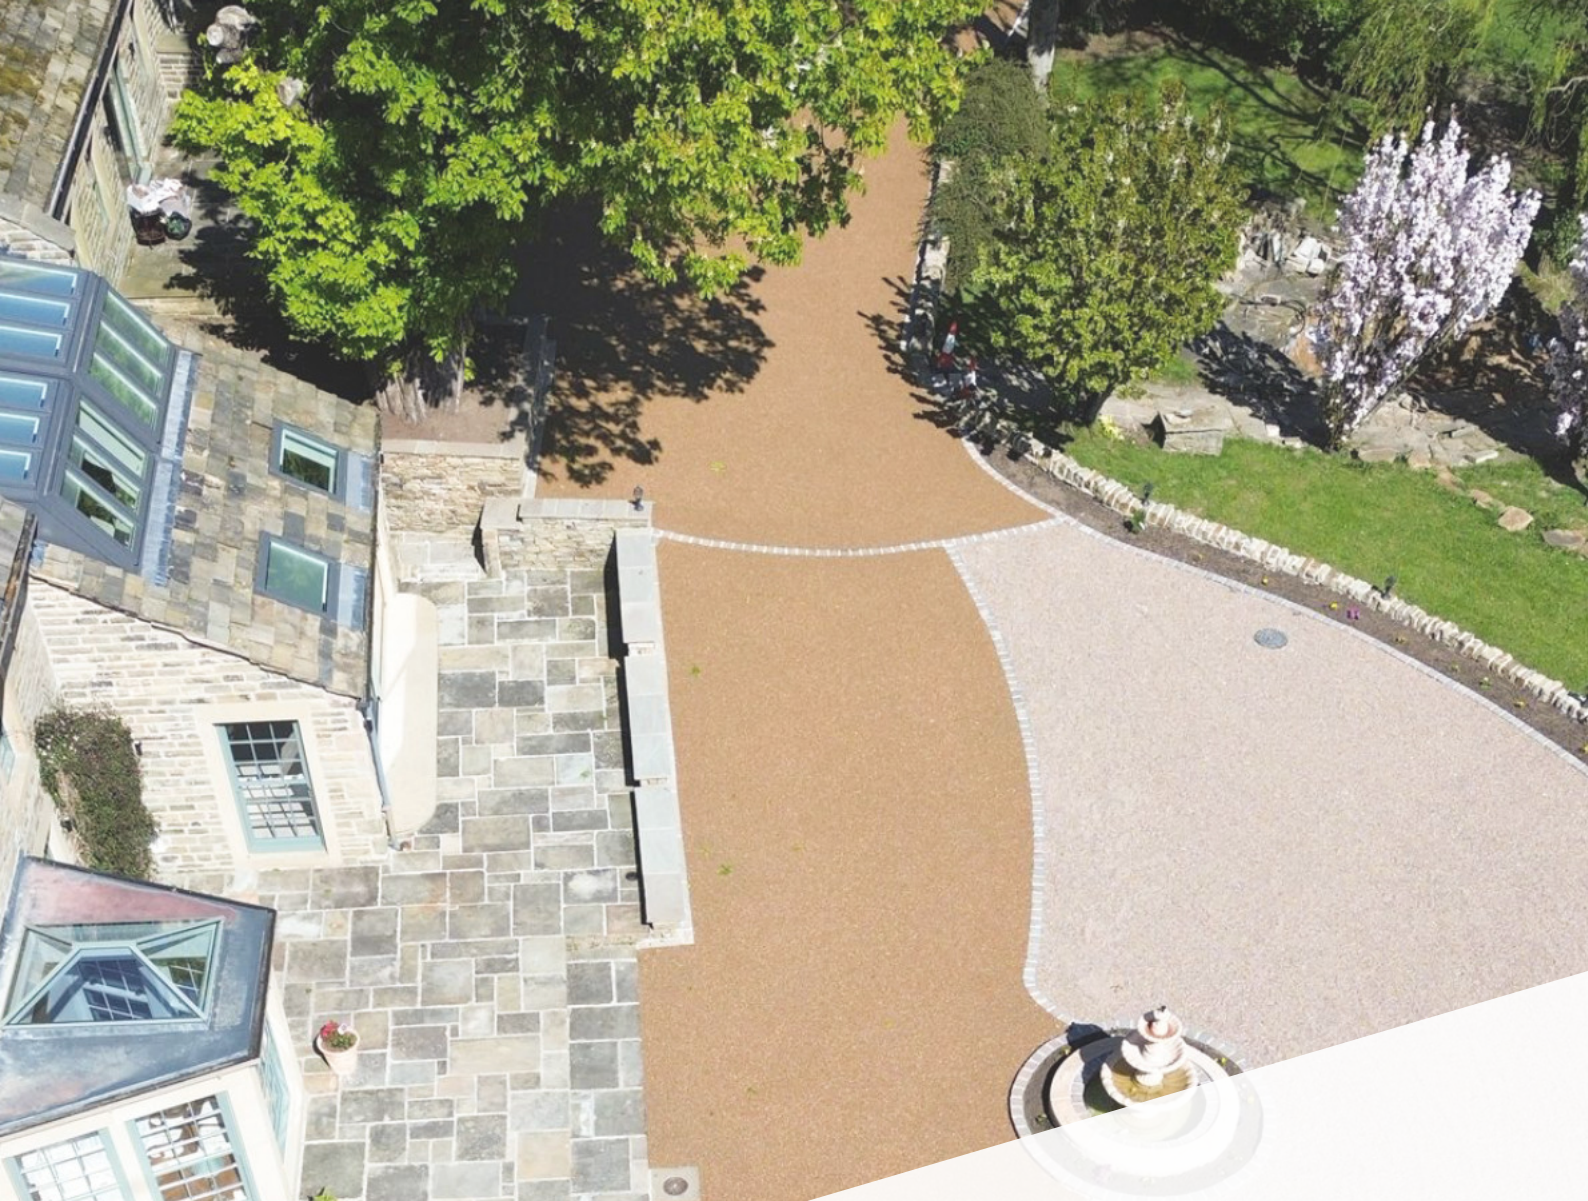

Porous & SuDS-Compliant - allows rainwater to drain through the surface naturally.

Durable & Long-Lasting - built to withstand vehicle traffic and pedestrian traffic.

Expertly Hand-installed - ensuring a smooth, seamless result.

Wide Range of Colours - create a finish that complements your home.

Low Maintenance - effortless to keep clean and looking great for years to come.
