

**CBeebies Land Hotel, Alton Towers**

# CBEEBIES Land Alton Towers Resort

PMP Surfacing was appointed to carry out remedial works in front of the CBeebies Land Hotel and were asked if we could achieve the vision that the hotel originally had when it opened back in 2017.

We had previously installed our Bounceback safety surfacing at the CBeebies Land Hotel in 2022 and was asked to return to give the hotel a brand new look.

In order to do so, we removed all the existing surfacing and re-prepared the groundworks and sub-base to make it fully permeable. We then installed our meadow Flexistone blend for the main area with six bespoke accompanying Colourbound colours, supplied by Vuba resin systems.

#### SPECIFICATION:

- HDST-20, 20mm
- 180m<sup>2</sup> of Meadow UVr
- 54m<sup>2</sup> of Specific RAL Colourbound UVr

## flexistone Colourbound

Colourbound is an aliphatic, two-component polyurethane binder system infused with colour pigment. The pigment can be a specific RAL number if required.

Ideal for pathways and decorative elements such as pictures, patterns, logos, emblems, or signage within surfacing.

\*Unfortunately, it is not suitable for driveways.

# flexistone

This project was for one of our most prestigious clients, Merlin Entertainments.

Previous works include the LegoLand Mythica project and the World of Jumanji project at Chessington World of Adventures which opened in May 2023.

- **HIGHLY DECORATIVE**
- **LOW-MAINTENANCE**
- **BESPOKE BLENDS**
- **FULLY PERMEABLE  
(SUDs Compliant)**
