World of Jumanji Project**

World of Jumanji Chessington WOA

Working alongside B and E Entertainments, the brand-new world of Jumanji Land at Chessington World of Adventures opened in May 2023. PMP surfacing installed 3000 m² of Flexistone and 500 m² of Flexipave in a major install in the brand new attraction.

Thousands of visitors around the world have visited since it opened to customers in what has been described as Chessington's single largest investment in its history

The unique blend of KBI's Flexistone system has been developed to create a visually dynamic surface that fulfilled all drainage requirements for the area.

SPECIFICATION:

- 3000m2 of Flexistone
- 4 Colours
- 500 m2 of Flexipave
- Colourbound stencils

flexistone

flexipave

‘We are excited to have collaborated on a global scale with top tier industry talent at Merlin Entertainments and Chessington World of Adventures Resort for this achievement. The Jumanji franchise has generations of fans who can now enjoy the story in a whole new way. We thank everybody in making this one of the best worldwide attractions around.’

Jeffrey Godsick, EVP OF Global Partnerships Brand Management and Head of Entertainment at Sony Pictures Entertainment

This project was the latest one that we completed for our client Merlin Entertainment as part of the Merlin Magic Makers project team.

It took the team at PMP Surfacing 5 months to complete the program.
