Enhancing Golf Clubs with our Premium Flexipave

Flexipave Surfacing Solutions enhance golf clubs with durable, low-maintenance surfaces that look great all year-round. Ideal for pathways, pedestrian access and outdoor spaces, Flexipave offers a smooth finish, versatile colour options and long-lasting performance, creating practical, attractive environments built to withstand where everyday use is required but where drainage is also a key consideration.

Tynemouth Golf Club

PMP Surfacing transformed Tynemouth Golf Club with our innovative Flexipave Surfacing, addressing poor accessibility and persistent drainage issues. Following consultation, Flexipave was identified as the ideal solution, providing a durable, all-weather surface that improves safety and convenience. The upgraded pathways help overcome winter accessibility challenges, ensuring golfers and visitors can enjoy a welcoming, reliable course environment throughout the year, regardless of changing weather conditions.

Transformation of Tynemouth Golf Club

To resolve long-standing pathway issues, PMP Surfacing recommended Flexipave to enhance course accessibility and elevate the overall player experience. Since installation, the club has seen a noticeable boost in member satisfaction, with golfers praising the smooth, reliable surfaces and improved playability.

Durable Solutions for Whitley Bay

The partnership began with PMP Surfacing installing the initial Flexipave pathway through the challenging terrain of the Dene at Whitley Bay Golf Club. The immediate success of the installation demonstrated Flexipave's superior durability and performance, prompting course manager Martin Woods to expand the project course-wide.

To ensure long-term efficiency and long-term sufficiency. PMP Surfacing provided comprehensive installation training to Whitley Bay Golf Club and their greenkeeping team. Equipped with this expertise, the in-house team has successfully installed over 2,000 square meters of Flexipave across the facility.

Thanks to high-performance surfacing by PMP, Whitley Bay Golf Club now boasts a premier, 365 - day accessible course engineered to withstand heavy foot traffic and adverse weather conditions. This investment has been a major driver of commercial success - fueling a booming membership waiting list and enabling the successful reinstatement of joining fees.

Our Other Projects in the North East

Saltburn Golf Club - Pathway improvements completed using Signal Red Flexipave, delivering 80m² of durable, permeable surfacing installed to enhance accessibility and appearance.

Consett Golf Club - Enhanced the course facilities with an extended 1st Tee area and upgraded pathway, incorporating 87m² of Flexipave surfacing to provide a long-lasting, practical and visually improved finish.

- **Improved Safety** - creates stable, slip-resistant pathways that remain accessible throughout the year.
- **Excellent Drainage** - the porous surface prevents standing water, reducing mud and puddles after rain.
- **Long-Lasting Durability** - built to withstand heavy foot traffic, golf buggies and changing weather conditions.
- **Enhanced Appearance** - provides a smooth, attractive finish that complements the natural surroundings of the golf course.

Tynemouth Golf Club Testimonial

"The excessive costs of maintaining what were very tired paths at Tynemouth Golf Club seemed like a waste of money. Members were complaining that the paths were uneven, muddy when wet and slippery - especially in the winter.

We initially approached PMP Surfacing about the path on the 18th tee. We agreed a price and the path was installed. I have nothing but praise for PMP Surfacing; even when issues arose, they addressed and sorted them immediately. Following the success of that path, it was a no-brainer and we we decided that all the paths needed doing.

We contacted PMP Surfacing to prepare and install the paths, including the base preparation. Despite choosing the worst autumn and winter weather possible, PMP Surfacing worked brilliantly alongside our Head Greenkeeper. They managed to give us paths that we are really proud of and both members and visitors praise their quality and appearance. I would have no hesitation in recommending PMP Surfacing to any golf club".

David Steven, Chairman of Greens

Whitley Bay Golf Club Testimonial

"We have worked closely with PMP Surfacing over the past four years. Initially, our Course Manager, Martin Woods, had seen Flexipave at the BTME Exhibition in Harrogate and, after joining the Club, he felt that Flexipave could help get the club out of a real issue. Our bridge over the Dene had been condemned, and the replacement was far too costly. The only alternative was to use the maintenance track down into and up out of the Dene.

PMP Surfacing used Flexipave to create an all-weather, porous, non-slip surface on the path. The pathway running through the trees has now become a real feature of the course.
We decided as a club that all our paths would benefit from a Flexipave surface. Working with PMP Surfacing, our team was trained in the installation, becoming Strategic Golf Partners with PMP Surfacing. With our in-house experience, we prepared the paths for the Flexipave ourselves.

Through the efforts of Martin and his team, we have saved nearly £50,000 in installation costs and via the discounts passed on to us as Partners. With over 2,500m² of path now installed over the years, we really feel that Flexipave is a major asset to the club. It has helped us to create what we feel is a 365-day golf course, helping to retain existing members and attract new ones to the club."

Martin Woods, Course Manager
