Resin Bound for New Housing Developments

Using PMP Surfacing's high-quality natural stone aggregate combined with a polyurethane binder, our resin-bound surfacing is an ideal solution for housing developers delivering premium new-build estates. It provides a visually appealing, durable and permeable surface with excellent drainage, enhancing the overall finish and value of every plot.

Trusted by leading developers such as Barratt Homes, Taylor Wimpey and Redrow. PMP Surfacing is one of the UK's leading installers of resin bound systems, with over 10 years of experience across large-scale residential developments. Our resin-bound stone system creates a smooth, seamless finish for driveways, pathways and communal areas, with each installation hand-laid and machine-laid by our experienced team to ensure consistency, quality and long-lasting kerb appeal across every development.

Resin Bound Housing System

PMP Resin Bound Surfacing is an ideal solution for new housing developments, combining a premium appearance with practical, sustainable performance. Its porous structure allows rainwater to drain naturally through the surface, preventing puddling and standing water across driveways, footpaths and shared areas.

Fully SuDS compliant, it helps developers meet planning and environmental requirements while maintaining a clean, uniform finish. Available in a wide range of natural stone blends, it offers a cohesive look across all plots, suitable for both contemporary and traditional housing schemes.

"From a commercial point of view we are very happy with the product. It is aesthetically very pleasing and from a price and installation point of view meets the criteria we expect". *Phillip Hinton, Quantity Surveyor for Barratt Homes*

Decorative Surface Solutions

Premium Decorative Finish - enhances the appearance of driveways, footpaths and shared areas across developments.

Highly Porous & SuDS Compliant - supports natural drainage and helps meet planning and environmental requirements.

Durable & Long-Lasting - designed to withstand consistent vehicle and pedestrian traffic across multiple plots.

Expertly Installed - hand-laid or machine-laid by experienced teams to ensure a consistent, high-quality finish site-wide.

Wide Range of Colours - complements both contemporary and traditional housing schemes while maintaining long-term visual appeal.
