Resin Bound

General Information

pmpsurfacing.co.uk

Porous Resin Bound Specialists

PMP Surfacing is a specialist of sustainable porous paving solutions. Our resin bound surfacing systems have been carefully developed to deliver exceptional performance, durability and visual appeal, establishing PMP Surfacing as a leading provider of permeable surfacing solutions.

Unlike traditional hard surfaces, our resin bound system combines two key features- high porosity and flexibility - to provide a durable, attractive finish that allows water to drain naturally while helping to accomodate minor ground movement.

Quality That Endures

PMP Resin Bound Surfacing provides a durable, UV-resistant finish that retains its colour and appearance, delivering a beautiful, low-maintenance solution that is designed to last.

What is Resin Bound Surfacing?

Commercial Projects

Proudly trusted by leading commercial businesses, developers and local communities to deliver high-quality, lasting transformations.

Domestic Projects

The go-to choice for homeowners, property renovators and neighbourhoods looking for quality that lasts

Frequently Asked Questions

What is Resin Bound Surfacing?

PMP Resin Bound Surfacing is a decorative, porous paving system made by mixing high-quality natural stone aggregates with a clear UV resitant polyurethane resin. The mixture is hand and machine installed to create a smooth, seamless and highly durable finished suitable for commercial and residential use.

Is PMP Resin Bound Surfacing porous?

Yes. The system is fully porous, allowing rainwater to drain naturally through the surface and into the sub-base, helping to **reduce standing water and feed natural aquifers.**

Where can Resin Bound Surfacing be installed?

PMP Resin Bound Surfacing is suitable for a wide range of applications including driveways, footpaths, patios, commercial developments, public spaces and residential projects.

Is Resin Bound Surfacing available in different colours?

Yes. We have a wide of natural aggregate blends available to complement both traditional and contemporary properties.

Permeable Seamless Sustainable Durable Low Maintenance

Flexible Porous Paving Solution

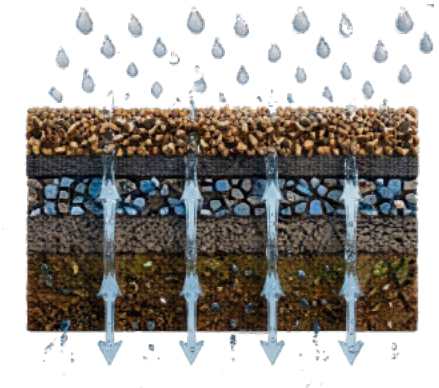

PMP Resin Bound is a stone aggregate bound with a specialist polyurethane binder and installed by machine and hand. The nature of our binder gives the finished surface a dynamic flexibility that would be impossible to achieve with traditional hard materials. Resin Bound is the perfect solution for when vehicular access is required but where drainage is also a key consideration.

To achieve the required depth, the thickness of the finished surface depends on how the finished surface will be used but our engineers work closely with clients to identify the best solution to the project. Resin Bound product is designed to promote water recharge directly into natural aquifers but we also provide several different solutions for managing rainfall once the water has penetrated our top surface.

Key Product Benefits

- Supports sustainable drainage (SuDS) allowing water to naturally permeate through the surface.
- Reduces standing water helping to prevent puddles and localised flooding
- Replenishes groundwater by directing rainwater back into the earth.
- Better for the environment by promoting a natural water cycle and reducing the strain on local drainage infrastructure.

Highly Porous - allows large volumes of water and air to penetrate the surface, reducing surface water, promoting natural drainage and encouraging healthy root growth.

Versatile Installation - can be installed onto a variety of suitable base types, making it ideal for a wide range of applications and site conditions.

Dynamic & Flexible - the resilient surface accommodates natural ground movement, helping to minimise the risk of cracking over time.

Weather Resistant - engineered to withstand extreme hot and cold temperatures without cracking, ensuring long-lasting performance.

Colour Choices

The colours below are just a small selection of our extensive range of natural stone blends available to suit every project
