Resin Bound Surfacing

pmpsurfacing.co.uk

Preserving Historic Elegance

Bramhall Hall in Stockport is a superb example of a Tudor Manor House with origins dating back to the Middle Ages. The Hall is considered one of the most beautiful treasures of England, striking great national importance.

PMP Surfacing installed 1000m² of Resin Bound in a huge installation surrounding the hall terraces. The installation of Resin Bound surfaces yielded transformative results, exceeding expectations in both functionality and aesthetics. The hall terraces were given a stunning look, enhancing the visual appeal and creating an inviting atmosphere for visitors. Our Resin Bound surface's robust properties also proved resilient against foot traffic and environmental factors, ensuring long-term durability and minimal maintenance requirements.

Seamless Access, Natural Beauty

In this collaborative project, we installed both Flexipave system has improved accessibility through the park, as well as improving the aesthetic.

One of the highlights of Bramhall Park is its stunning gardens, which showcase a wide variety of plant species and colourful blooms throughout the year. The Flexipave surface provides an accessible pathway which links the woodland to the gardens, as well as preventing a safer surface in winter months. The porous surface also improves drainage, helping visitors enjoy the park comfortably throughout the seasons.

Project Benefit

Improved Visual Appeal - created a natural, attractive finish that complements the historic surroundings.

Enhanced Drainage - porous construction allows rainwater to drain through the surface.

Reduced Maintenance - durable design minimises upkeep and long-term maintenance.

Sustainable Development - manufactured using recycled materials to support sustainable construction.

1,068 Recycled Tyres - reused the equivalent of 1,068 vehicle tyres within tyres within the surface.

23,496kg CO_2 Saved - prevented approximately 23,496kg of CO_2 emissions through tyre recycling.
