

**Arc'teryx Retail Outlet
Covent Garden**

Covent Garden

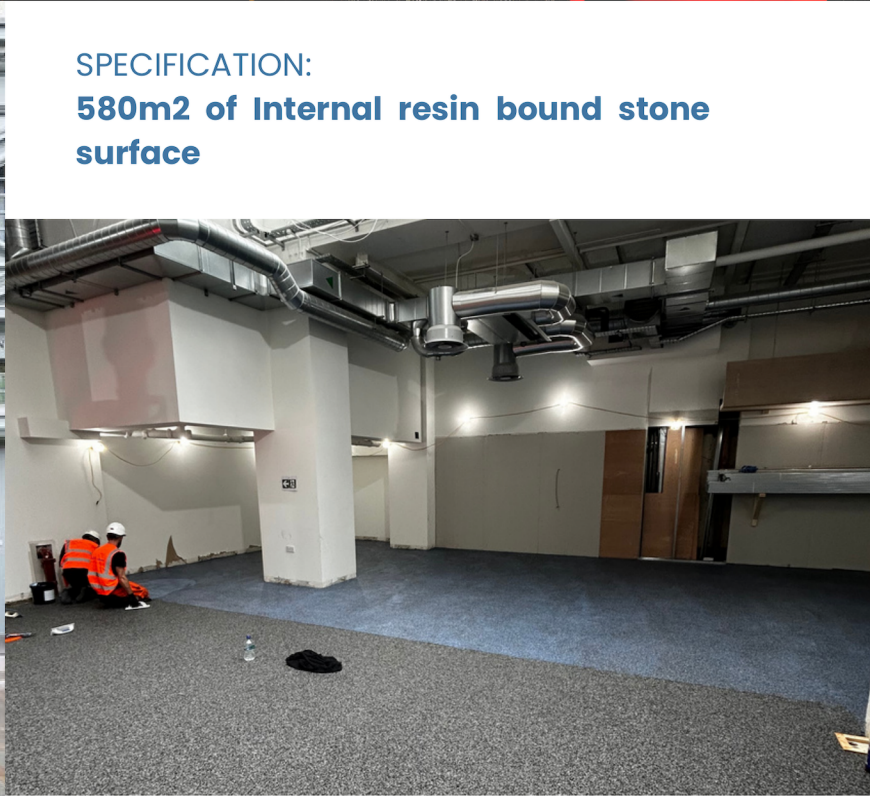

PMP Surfacing were appointed to install a specialist internal quartz carpet, for a brand new retail experience for Arc'teryx.

The brand is a Canadian performance outdoor equipment and clothing company known for leading innovations in Climbing, Skiing and Alpine technologies.

This exciting project involved the use of Vuba Resin products, specifically requested by the retailer for the interior aesthetic they were seeking to create.

Interior fit out solutions specialist, Esprit UK Limited, were appointed main contractor for this high-end retail project.

SPECIFICATION:

580m2 of Internal resin bound stone surface

The installation required a three stage process:

1- Liquid Damp Proof Membrane - First step was to cover the new concrete screed with a Hydraguard liquid DPM system - this prevents the release of moisture from substrates as well as providing a waterproof layer before the internal quartz carpet is installed.

2- Resin Floor - Internal quartz carpet installed.

3- Pore Filler - The final process was to apply and install the highly viscous, 1-component, UV resistant Pore Filler. This forms a hard and elastic film that +/ 99% of the pores. This then ensures the surface can be cleaned and maintained.

We installed the internal resin bound surface in an intense three-stage process over a period of six days, which required careful coordination alongside the factor of working with other contractors to ensure that the project schedule was adhered to.

- **HIGHLY DECORATIVE**
- **RANGE OF COLOURS AVAILABLE**
- **CAN BE EASILY CLEANED AND MAINTAINED**
